 <p>2m³ 1.8m long 1.4m wide 1m high</p>	 x 8	 x 2

Maintaining a clean worksite is an important task for any project regardless of the size. A clean area means improved efficiency and safer conditions. Choose the right skip bin size that fits your project.

We have the following skip bin sizes available for residential and commercial sites across the entire Perth Metro area:

- **2m³**: This smaller skip is suitable for small cleanups such as minor home renovations or yard work. The capacity is equivalent to two standard box trailers.

- **3m³**: This skip bin size is capable of holding approximately three trailer loads and is ideal for general waste from worksites.
- **4m³**: Capable of holding four trailer loads, this skip bin size is better suited for larger types of cleanups such as for commercial projects.
- **6m³**: Need to remove more rubbish? Then we recommend getting a larger size. This one is able to hold approximately six trailer loads.
- **10m³**: This is the largest skip bin size we have available and is ideal for larger scale cleanups on commercial or industrial sites.
